PRODUCT

## Rapid-Set Polyurethane Formula

We're proud to introduce our newest addition to the SRW Adhesive family. It is specially formulated for construction and landscape projects that require a fast set-up time. This adhesive has proven to be a premier choice, providing a fast, but permanent bond. It can be used on almost any material, even non-porous substrates such as foam, metals, etc.

### Benefits

- ▶ Fastest set-up time on the market
- ▶ High-temperature adhesive suitable for firepits
- ▶ For use on dry or damp surfaces
- ▶ Interior/exterior applications
- ▶ VOC-compliant in all 50 states and Canada
- ▶ Premium, long-lasting strength

**Holds Strong  
After Just 60-90 Minutes!**

### APPLICATIONS:

- ▶ Retaining walls
- ▶ Pavers & Brick
- ▶ Concrete
- ▶ Natural stone
- ▶ Pool copings
- ▶ Firepits
- ▶ Metal
- ▶ Wood
- ▶ Foam
- ▶ Vinyl & PVC

*Works on most common landscaping and construction materials.*

### Application temps:

Above 40°F for adhesive, 32°F for surfaces

**Method of application:** Caulking gun. Lightly mist surface for faster set-up.

**Shelf life:** 12 months

**Working time:** 15 minutes

**Storage:** Store in a cool, dry place in upright position out of direct sunlight. Will not freeze or be damaged by low temperatures.

## SRW® Adhesive Now Available in 2 Formulas!

### WHICH SRW ADHESIVE?

Rapid-Set Polyurethane	Superior Strength Solvent-Based
Moisture-based cure for a fast and strong permanent bond	Solvent-based adhesive creates the strongest hold
Application surface temps above 32°F	Extrudes down to 10°F Works on wet or frozen surfaces
1 year shelf life	18 month shelf life—the longest in the industry

Coverage	Approximate length of bead according to container size & bead diameter		
	Bead Size	10 oz	28 oz
	1/4" bead	32 ft	89 ft
	3/8" bead	14 ft	35 ft

## Superior Strength Solvent-Based Formula

For over 25 years, SRW Adhesive has been time-tested in countless hardscape projects throughout the United States and Canada. Over and over, it has proven its strength and performance. We proudly offer this cornerstone product to you, knowing that this adhesive will meet or exceed your expectations.

### Benefits

- ▶ Superior strength and longevity
- ▶ Works on wet or frozen surfaces
- ▶ Extrudes down to 10°F
- ▶ Will not freeze
- ▶ Permanent bond
- ▶ Regular and VOC compliant
- ▶ Interior/exterior use

**Bonds to  
Wet or Frozen Surfaces!**

### APPLICATIONS:

- ▶ Retaining walls
- ▶ Pavers
- ▶ Block
- ▶ Firepits
- ▶ Concrete
- ▶ Metal
- ▶ Wood
- ▶ Natural stone

*Works on most common landscaping and construction materials.*

### Application temps:

10°F–120°F, for adhesive and surfaces

### Method of application:

Caulking gun. Flashing with initial tack creates a faster cure from momentary pressure.

**Shelf life:** 18 months

**Working time:** 10 minutes

**Storage:** Store in an upright position out of direct sunlight. Will not freeze or be damaged by low temperatures.

## Directions

### 1. CLEAN SURFACE

- ▶ Remove oil, grease, ice, water, or dirt that may interfere with bond.

### 2. PREPARE TUBE

- ▶ Cut tip at slant for 1/4" or 3/8" bead
- ▶ Puncture seal
- ▶ Place tube in gun

### 3. APPLY

- ▶ Apply only the amount you can cover in 10 min. See user tips for suggested patterns

### 4. SET IN PLACE

- ▶ Set block, reposition if needed
- ▶ Do not smear or use trowel

### APPLICATION PATTERNS FOR OPTIMAL MOISTURE DRAINAGE

## User Tips

1. When using on tumbled products, we recommend using a 3/8" bead. Make sure surface is clean of any dust, dirt or material that may deter proper adhesion.
2. For steps or high-traffic areas, wait 48 hours before use and 4–5 days for cure.
3. If surface has grooves, make sure adhesive is bonding to both surfaces.
4. Not intended for continuous submersion or use below the waterline.
5. Not for use on plastic, rubber, or fiberglass materials.
6. When using on applications that need optimal water flow, consider the adhesive application patterns to the left.

## SRW Caulking Guns

SRW offers two types of caulking guns, both available in 10 and 28 oz sizes, engineered to provide superior performance at a price point that's right for you.

## How can I make SRW solvent-based adhesive set-up faster?

Flash the adhesive. Flashing (or lifting the cap or block) for a couple of seconds will release up to 50% of the solvents within the adhesive to shorten the curing process.

## Do I have to store SRW adhesive in a heated area?

No. Both the regular and VOC are solvent-based formulas that will not freeze. It's best to store tube in an upright position to avoid excess extrusion.

## How can I help prevent damage from trapped moisture in my project?

Consult the application patterns under "User Tips" for possible methods of adhesive application. Choose the best methods for your particular project to allow for optimal moisture drainage.

## When using on wet surfaces, what should I look for to ensure it's bonding?

If adhesive doesn't seem to be sticking upon initial application, the surface may be too wet. Remove excessive moisture, reapply, and set. To set, flash the adhesive to be sure it is bonding to both cap and block.

## Can I apply SRW adhesive to block around a firepit?

Yes. Make sure adhesive does not come into direct contact with flames.

**Now available from SRW—your leading hardscape supplier:**

## DAP SMARTBOND Landscape Construction Adhesive

DAP® SMARTBOND™ Landscape Adhesive Construction Gel is a unique technology that applies as a foam and transforms by collapsing into a high-strength, fast-curing adhesive gel. It develops a strong, durable and permanent bond to landscape blocks, synthetic stone, wood, concrete, treated wood and other hardscape materials.

- ▶ Quick set-up
- ▶ 8X more coverage than standard cartridge adhesives
- ▶ 25% faster to apply—less gunning, less change out, less fatigue
- ▶ Unique foam collapses to form a gel
- ▶ Polyurethane formula
